

How can Schroth Systems Consulting help RESUMate® users?

If you are implementing RESUMate® you have probably found many areas where RESUMate® has made your life much simpler. But there may also be areas that you would like to address where you need some special help. These areas might include:

1. **Import of existing data** – If you have large amounts of data in an existing system, you may find that the import tools provided with RESUMate® don't do everything you need them to do, particularly in terms of providing links between related data.
2. **Enhanced reporting capabilities** – Perhaps you need more power and flexibility in your reporting than RESUMate® can provide. We have created a custom reporting system that greatly enhances the reporting available.
3. **Web access to RESUMate® data** – Let's say you want to allow candidates to search available job orders on your website, or to have new Candidates enter their data and submit resumes directly into RESUMate®. We can help!
4. **Automated emails to RESUMate® clients** – If you search for candidates in RESUMate®, wouldn't it be nice to be able to send out a nice personalized email to everyone that you found in the search? We can provide a tool to do that!
5. **Producing a special Hire Package** – Perhaps you have a set of forms or documents you would like to produce each time a candidate is placed. We can create a system to produce everything you need at the touch of a button

Specialized Service and Support:

Are there other services you would be interested in? Just let us know. We would be happy to provide whatever special programming support you may need. And we not only help you meet your needs today, but we also provide continuing support into the future.

Schroth Systems Consulting, Inc. provides a Free Initial Consultation

If you wonder if we may be able to help you, we are always happy to talk with you at no charge, review your situation, and discuss how we would approach your requirements.
